Cell Description

The MUX2 cell is a 2-to-1 multiplexer. The state of the select input (S0) determines which data input (A, B) is presented to the output (Y). The output (Y) is represented by the logic equation:

WARNING: The output pin Y has the potential to glitch low during a high-to-low transition on the S0 input when A=B=1. Use this cell with caution when driving clock or other control signals in your design.

Cell Description

The MUX2 cell is a 2-to-1 multiplexer. The state of the select input (S0) determines which data input (A, B) is presented to the output (Y). The output (Y) is represented by the logic equation:

WARNING: The output pin Y has the potential to glitch low during a high-to-low transition on the S0 input when A=B=1. Use this cell with caution when driving clock or other control signals in your design.

Cell Description

The MUX2 cell is a 2-to-1 multiplexer. The state of the select input (S0) determines which data input (A, B) is presented to the output (Y). The output (Y) is represented by the logic equation:

WARNING: The output pin Y has the potential to glitch low during a high-to-low transition on the S0 input when A=B=1. Use this cell with caution when driving clock or other control signals in your design.

Cell Description

The MUX2 cell is a 2-to-1 multiplexer. The state of the select input (S0) determines which data input (A, B) is presented to the output (Y). The output (Y) is represented by the logic equation:

WARNING: The output pin Y has the potential to glitch low during a high-to-low transition on the S0 input when A=B=1. Use this cell with caution when driving clock or other control signals in your design.

Cell Description

The MUX2 cell is a 2-to-1 multiplexer. The state of the select input (S0) determines which data input (A, B) is presented to the output (Y). The output (Y) is represented by the logic equation:

WARNING: The output pin Y has the potential to glitch low during a high-to-low transition on the S0 input when A=B=1. Use this cell with caution when driving clock or other control signals in your design.
